

ZOOM 9002 PRO

ADVANCED GUITAR EFFECTS PROCESSOR

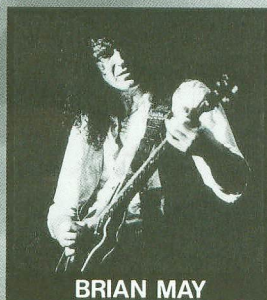

THE PROFESSIONAL'S CHOICE

The ZOOM 9002 PRO is a new professional version of the revolutionary 9002 Advanced Guitar Effects Processor.

The wealth of knowledge, experience and recommendations from world-class 9002 users has been crafted into this incredible new expressive tool. 40 new artist patches, plus all 40 of the original patches are built into what is the world's smallest, lightest most comprehensive guitar effects processor.

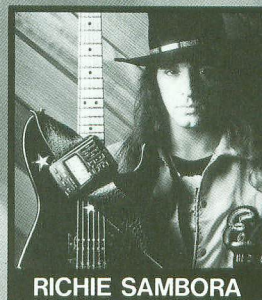

Its one-of-kind innovative design, featuring superior Noise Reduction, Amp Simulation, Zoom's famous, natural Analog Distortion, a rechargeable battery and secure belt or strap loops, and a new performance foot controller - make the 9002 PRO the perfect companion for great tone, anywhere, anytime.

ZOOM 9002 PRO

ADVANCED GUITAR EFFECTS PROCESSOR

80 Total Patches : 40 Artist Patches, and 40 Original 9002 Patches

New custom Artist patches pay respect to many legendary guitarists. Each individual patch is specially designed to express the sound and style of a wide range of professional guitarists and musical ideas.

Many of the artists that help Zoom with sound design are still passionate 9002 users. Of course the 9002PRO has ample User memory space for your own patch creations. The Artist and preset patches are loaded in the ROM memory and can be recalled at any time, even after you rewrite them.

World's Smallest, Most Complete Compact Effects Device

Weighing in at less than 280g, including the rechargeable battery, the palm-sized 9002PRO is the smallest and lightest most comprehensive multi-effects product available. Analog Compression and Distortion, plus a huge arsenal of digital effects including Pitch, Chorus, Flanger, Phaser, Delays, Reverbs and Special

Effects like Step and Auto Wah, make the new 9002PRO the perfect portable processor. Instant access to the effect parameters with the three faders is a proven easy operation feature that puts the 9002PRO in a class by itself.

Built in Noise Reduction and Amp Simulation

Even at high gain settings, the 9002PRO's noise reduction system musically controls noise.

Adjustments can be made to find the setting that is best for your individual guitar pick-up configuration.

The Amp Simulation works so well, that many professional guitarists use the line setting then record direct!

Performance Foot Controller

The FC02 Foot Remote Controller gives 9002PRO users the ability to control BANK, PATCH and Bypass instantly. The 9002R Guitar Mount Remote Controller, and 9002F Foot Remote Controllers can also be used to control within each bank.

ARTIST PATCH LIST (User Bank)
